

## INFORMATION 2018

### The Ninth International Conference on INFORMATION

#### GENERAL CHAIR

**Lei Li**

*Hosei University, Japan*

#### ORGANIZING CHAIRS

**Ryuichi Ashino**

*Osaka Kyoiku University, Japan*

**Kang Yen**

*Florida International University, USA*

#### PROGRAM CHAIRS

**Chih-Cheng Hung**

*Kennesaw State University, USA*

**Hiroshi Ohnishi**

*Keio University, Japan*

#### CONFERENCE OFFICE

E-Mail: [office@information-iii.org](mailto:office@information-iii.org)

**December 7 - 9, 2018, Hotel Arcadia, Tokyo, Japan**

**Hosted by International Information Institute**

#### BACKGROUND AND AIMS

The most distinctive feature in the development of modern sciences and technologies is that various sciences, which were classified so far according to their research objects and methodologies, penetrate and combine with each other gradually. Therefore, many new disciplines and technologies were born from boundary areas of those existing sciences. Today, from classical sciences to modern technologies, almost all sciences and technologies are depended on each other so closely that they cannot exist and grow independently and have to grow in harmony with each other. There is an abstract, general and cross-cutting concept that concerns all scientific methodologies and sciences, it is "Information". The International Conference on Information is an interdisciplinary international conference series. It provides a forum for all scientists and technicians throughout the world to exchange scientific information such as original ideas, research methods and research results related to all scientific fields. Information'2018 will include keynote addresses, invited speeches, special workshops, contributed presentations (Lectures or Posters). The conference proceeding will be published by International Information Institute and available to delegates at the time of registration. And the papers presented in the conference will be selected as regular papers for publication in INFORMATION: An International Interdisciplinary Journal. The keyword "Information" is being permeated to all fields in sciences and technologies. This conference reflects this change by choosing a broad scope with covering the following areas: (1) Mathematical and Natural Sciences, (2) Management and Social Sciences, (3) Agriculture and Engineering, (4) Medicine and Life Sciences.

#### SPECIAL WORKSHOPS

A special workshop will include over 5-10 speakers focusing on a single topic. The organizer of a special workshop invites the speakers and decides on the topics to be addressed. Proposals will be sent to the conference office.

#### CONTRIBUTED PRESENTATION

Please submit an abstract with 1-2 pages in MS-Word or PDF version to the conference office.

#### IMPORTANT DATES

Special Workshop Proposals: 30 September, 2018

Contributed Paper Proposals: 10 October, 2018

Notification of Acceptance: 20 October, 2018

Camera-Ready Manuscript (6 Pages): 31 October, 2018.

Early Registration: 31 October, 2018
